360 Suite
Business Objects Solutions

Which version of SAP BusinessObjects are you running?

BOAK
BUSINESS OBJECTS ARBEITSKREIS | 2019

SAP® Certified
Integration with SAP BusinessObjects

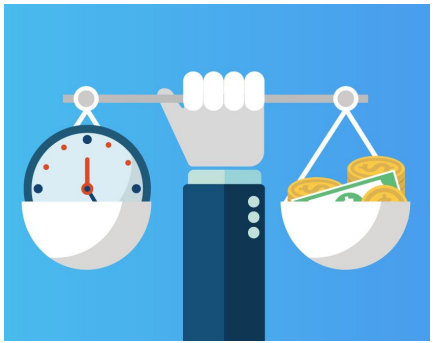
Migrating / Upgrading / Patching

Why?

- Vendor Support (SAP or 3rd Party)
- Features
- Bug Fixes

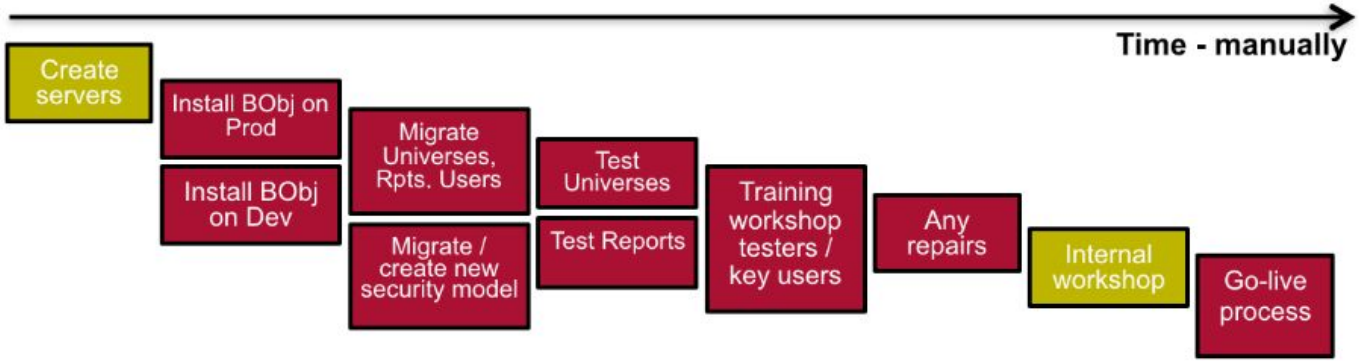
Why not?

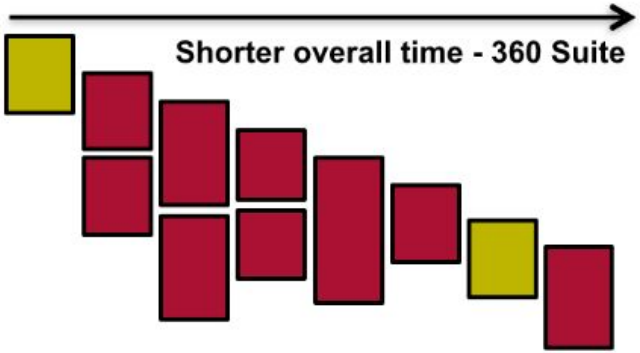
- Time
- Money

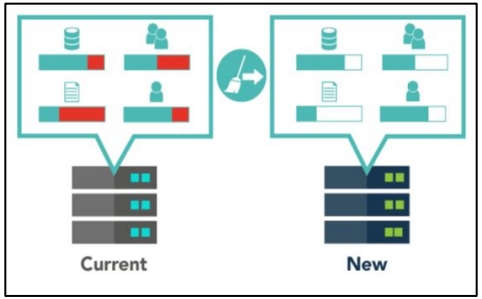


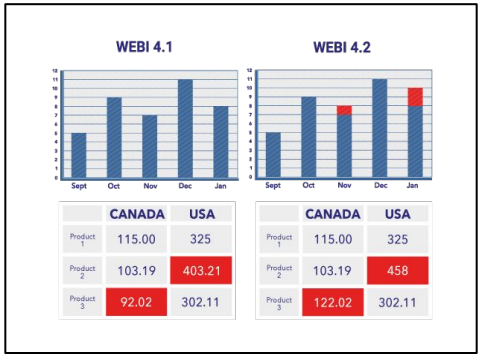
SAP® Certified
Integration with SAP BusinessObjects

Reducing Time & Cost









SAP® Certified
Integration with SAP BusinessObjects

Testing

SAP® Certified

360Suite Accelerators

BI Upgrade Accelerator

Fast-track and lower the cost of upgrading SAP BusinessObjects to the latest release

- Automate regression testing
- Leverage best practices
- Benefit from a proven methodology and phased approach

Cloud Migration Accelerator

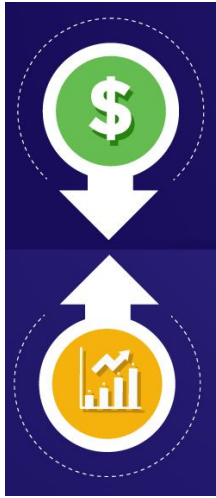
Reduce the TCO of SAP BusinessObjects by **successfully** migrating from on-prem to cloud hosting

- Prepare the platform
- Identify and resolve issues by comparing pre- and post-migration performance
- Protect sensitive data

Cloud Extension Accelerator

Maximize the value of converting unneeded, on-prem SAP BusinessObjects licenses using the SAP Cloud Extension Model

- Understand license consumption
- Gain insight through BI on BI for a smooth transition to SAP Analytics Cloud



SAP® Certified
Integration with SAP BusinessObjects

Working with 360Suite

1

ASSESSMENT & PLANNING

- Document the platform
- Identify/mark objects to clean up and migrate
- Establish sizing and performance expectations
- Create migration plan

2

EXECUTION

- Install and configure
- Migrate to cloud hosting
- Back up
- Clean up obsolete objects

3

VALIDATION & OPTIMIZATION

- Automate regression testing
- Review performance
- Compare content and security
- Optimize objects and platform

4

GOING LIVE

- Migrate the delta
- Promote to other environments
- Minimize the need for post-migration support
- Increase satisfaction and enhance user experience

5

DAY-TO-DAY MAINTENANCE

- Monitor performance
- Document utilization
- Create maintenance tasks
- Ensure availability

Spend Less and Achieve Success

SAP® Certified
Integration with SAP BusinessObjects

1. Assessment & Planning

- Get a crystal clear picture of the overall platform
- Identify objects that need to be migrated based on historical activity
- Establish the basis for sizing and performance requirements
- Design the migration plan

Key deliverable: Outputs to validate the migration project requirements

SAP® Certified
Integration with SAP BusinessObjects

Business Objects Solutions

BOAK
BUSINESS OBJECTS ARBEITSKREIS | 2019

SAP® Certified
Integration with SAP BusinessObjects

2. Execution

- Install and configure Business Objects on the cloud platform
- Run a backup on the old platform
- Clean up obsolete objects on the new platform (based on phase 1 insights)
- Migrate content from on-premise to the cloud platform

Key deliverable: A running Business Objects system on the cloud platform

SAP® Certified
Integration with SAP BusinessObjects

3. Validation & Optimization

- Automate regression testing of content between source (on-premise) and target (cloud)
- Validate performance of the new platform (execution time of business reports)
- Perform fine tuning before going live based on findings

Key deliverable: A tested and validated Business Objects platform in the cloud
